

### Abstract of the Disclosure

The present invention relates to a pharmaceutical preparation containing at least one compound of general formula (I)

wherein R<sub>1</sub> and R<sub>2</sub> are each independently of each other a straight-chain or branched alkyl residue having 1 to 30 carbon atoms, a straight-chain or branched alkenyl residue having 2 to 30 carbon atoms, a monocyclic or polycyclic alkyl residue having 3 to 30 carbon atoms, a monocyclic or polycyclic alkenyl residue having 4 to 30 carbon atoms, or a monocyclic or polycyclic aromatic residue having 6 to 30 carbon atoms, these residues being optionally substituted by one or several substituents. This invention also relates to the use of the pharmaceutical preparations for the immunosuppressive treatment and for the non-invasive treatment.
